

CIN628 Internet and Web Programming
Trimester 2 – 2013
Lab 2

Reference:

- HTML: <http://www.w3schools.com/>
- HTML5 and XHTML: <http://thenewboston.org/tutorials.php>

Part A

1. Referring back to the reading materials and lecture notes, construct a website that looks similar to the following

2. Much of the attributes are provided. You have to use your judgment and knowledge to identify other attributes and construct the webpage.
3. Upon successful creation of the web site, validate it using the validator provided by W3C. Note that it is normal to get errors for first couple of validations. Keep trying until the page is validated successfully without any errors or warnings.

Part B

Go through all the examples and tutorials from the reference site:

- HTML: <http://www.w3schools.com/>
- HTML5 and XHTML: <http://thenewboston.org/tutorials.php>
